

CASM behavior on real BeatThis OOF activations from SMC

● Reference | Direct ✕ CASM ▲ DBN (BPM=30-300) ○ PLPDP

**(a) Clear periodicity: CASM improves
smc/smc_037**

**(b) Ambiguous evidence: CASM defers
smc/smc_287**

Windows were selected post hoc for mechanism visualization, not for performance estimation. Every CASM beat remains on a retained activation maximum.
